Agilent 4073A Test Systems (JAD-37247)

Make: Advantest
Model: 4073A
Quantity: 1
Vintage: 2000
Inspection: Available

Configuration:

Model				4073A
Module name		Description		
Pinboard		Used to contact with prober card, number is defined by prober card max pin Qty is 48 , if you order HRSMU, you must use HR pin board.		
HR pinboard				E3122-66501 *45
Source Monitor Unit, Max Qty is 8	Medium power SMU	10fA current measurement resolution, 2uV voltage measurement resolution, max Voltage 100V, max Current 100mA		3
	High Resolution SMU	1fA current measurement resolution, 2uV voltage measurement resolution, max Voltage 100V, max Current 100mA		1
	High Power SMU	10fA current measurement resolution, 2uV voltage measurement resolution, max Voltage 200V, max Current 1A		1
Digital Voltage meter		1uV voltage measurement resolution, used for 1ohm level resistant measurement		NA
CV measurement unit	LCR meter	DC Bias Voltage: ±40V,		Agilent 4284A*1
Signal Analyzer		used for Ring Oscillator evaluation		NA
HV-SPGU		Pulse Generator two channel per Qty, selected if pulse is needed.		Agilent 8114A *1
SPECS-FA		For Factory automation		NA
